Chartered Institute of
Information Security

Your natural network

In any sector, few things matter more to commercial growth than identifying and connecting with an audience of industry peers – the prospective customers for the business solutions you offer. The challenge is how to do so naturally.

Your natural network

When you avoid being seen as a vendor, your credibility is enhanced, allowing you to demonstrate your professionalism and position your organisation for commercial growth. You'll naturally build trust, even as you showcase your capabilities.

For companies targeting the cyber and information security sector, Enterprise Membership of the Chartered Institute of Information Security (CIISec) connects solution providers with CIISec's expansive network of corporate partners.

> By joining THE community for cyber and information security professionals, you can expand your network, enhance your reputation and help to raise standards of professionalism across the industry.

Grow naturally

Enterprise membership of CIISec offers businesses access to our dedicated industry network. As a member of the only cyber and information security institution to have been granted Royal Charter status, you can:

- **Increase credibility** – connect with an informed audience, positioning your team as cyber security thought leaders in a professional environment

- **Enhance your network** – develop your natural network among industry peers likely to need the solutions you offer

- **Drive commercial value** – demonstrate your organisation's expertise, building thought leadership through speaking and writing opportunities at CIISec events

I wholeheartedly recommend others get involved in the CIISec, as a community of security professionals it is really positive to have a point of connectivity and alliance with a shared purpose. The organisations that are already members really demonstrates the commitment of large global corporates, mid-size firms and tech start-ups alike are all committed to the profession.

Indy Dhami
Associate Partner, IBM

Join our solution provider community

Across our membership, CIISec now represents more than 20,000 cyber and information security professionals. Increase your reputation and professional standing by joining them as an enterprise member and enjoy:

- Access to the leading network for the cyber and information security industry

- A credible professional platform

- New commercial opportunities

- Increased industry engagement

- Greater branding exposure

- External recognition through alignment with a trusted industry body

- Opportunities to demonstrate your industry commitment and gather feedback from the cyber community

- People development through CIISec's Skills Framework

- A deeper professional network across government, academia, commercial, law enforcement, the public sector and more

CIISec is recognised as one of the foremost global institutions in the area of information security. Learning and raising professional standards is what CIISec is all about and having been recognised in this way aligns my own professional journey with the values of CIISec.

Mark Hughes
SVP Security at DXC Technology

Membership investment

Enterprise Membership of CIISec is an investment in your commercial growth. The ability to speak with such an audience and the insight you would gather would easily **cover the cost of your membership**. Our inclusive packages incorporate access to a network of related organisations – many of them already CIISec corporate partners.
