

Corporate Membership

**Community
Collaboration
Success**

Empowers organisations to attract,
develop and retain the best cyber and
information security talent.

Supporting professional goals

Corporate Membership exists to help organisations develop capability and competency in cyber and information security. Whether your current focus is on developing talent or driving innovation, CIISec can support your goals through our Corporate Member programmes.

Corporate Membership of CIISec gives exclusive access to sector-leading professional development frameworks and educational initiatives. Being a Corporate Member also demonstrates a commitment to your team's continual career growth; developing your team enhances their credibility and yours.

Corporate Membership signals that your values align to CIISec's: professionalism, integrity, and excellence in cyber and information security.

Individual membership packages are included as part of Corporate Membership, they encourage staff to feel valued, motivated, and appreciated as they receive the benefits of belonging to their sector's professional body

Frameworks which have become the standard for cyber and information security help organisations to validate competency and provide a structured approach to development

Exclusive **development programmes** tailored to all experience levels, help build teams and provide structured progression pathways

Routes to higher accreditation such as **Professional Registration and Chartered Status** are made more efficient; we offer discounted rates for our Corporate Members

Network with senior leaders and influencers, raise the profile of your organisation by contributing to CIISec content, and receive complimentary tickets to our annual conference

Enjoy enhanced **professional credibility**, and stand out when consulting or pitching by using the CIISec member logo. We'll list you as a Corporate Member on our website and at our events

Complimentary access to our **Headstart course** can help non-technical or support staff get a better understanding of cyber and information security

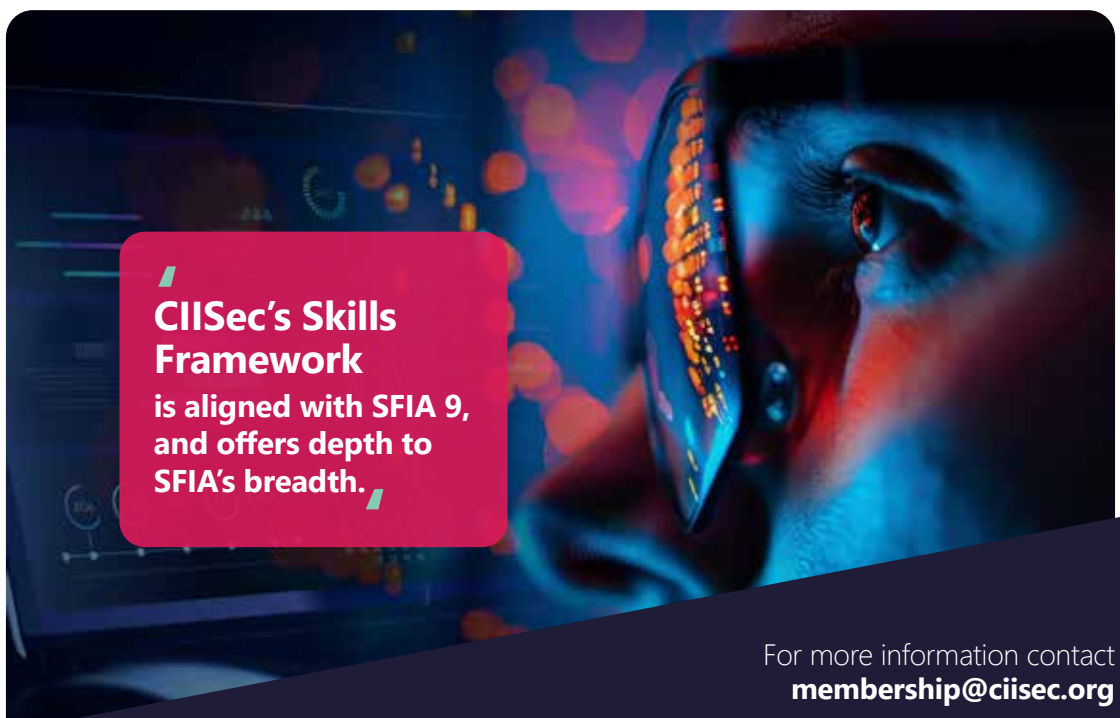

Scaffolding for cyber success

Corporate Members get access to our capability frameworks which enable professionals to validate their competency and provide a structured approach to developing a cyber and information security function.

The CIISec frameworks, developed in collaboration with industry, government, and academia, set the standards for skills, experience, and knowledge. CIISec's framework-based approach is the cornerstone of excellence in cyber security practices.

Corporate Membership includes a license to use the latest versions of our Skills Framework—widely recognised as the industry standard—as well as our Roles and Knowledge Frameworks. The value of access to these comprehensive resources alone exceeds the cost of membership.

CIISec's Skills Framework
is aligned with SFIA 9,
and offers depth to
SFIA's breadth.

Professional development to broaden horizons

An exclusive benefit of **Corporate Membership** is access to professional development programmes that will help you develop and retain your staff.

CIISec will work with your employees to understand where their current level of knowledge and experience lies. We will advise which programme aligns with their goals and offer support throughout their professional development. All participants must hold CIISec membership to enrol on our development programmes.

The one-year development programmes are delivered through monthly webinars led by industry experts, offering participants diverse perspectives from various sectors.

Completion of the CIISec development programmes goes a long way to conveying Associate or Full Member status on an individual; which carry post nominals and industry recognition and set members on their way to Professional Registration.

The **Associate Development Programme** (ADP) is designed for new entrants to the industry. This one-year programme is aligned to the CIISec Skills Framework and covers 32 cyberskill areas.

The **Full Development Programme** (FDP) is the next step, designed for those with more experience, it develops behavioural skills with a focus on leadership and management qualities.

The **CISO Development Programme**, set to launch in 2025, is designed for those who aspire to work at this level.

Membership that meets your needs

Each **membership tier is linked to organisation size**, and conveys a **range of benefits** to ensure your cyber and information security team has **access to all our professional development opportunities**.

Corporate Membership fees are reviewed annually but kept low and start at less than £2,000. Check the website for the **current Corporate Membership rates** and **break down of benefits**.

CIISec is **committed to raising levels of competency**, and **developing teams effectively**, so it is in our interest to ensure any organisation who wants to work with us can, irrespective of size or wealth.

Our membership team will listen to **your requirements and priorities**, and work with you to craft a membership package that **meets your needs** and **delivers on your objectives**.

Your **account manager** will ensure you are making the most of the benefits, and offer **tailored advice** to help individuals progress through the membership levels. We'll also help your teams **navigate Professional Registration** and Chartership in the most efficient and economical way.

We will **keep in touch directly** with individual members enrolled on our development programmes and will assist with assessments. A quarterly meet up with other Corporate Members will ensure you are informed of the **latest updates, developments and initiatives** from CIISec.

Corporate Membership that invests in the individual

CII Sec offers inclusive member packages as part of the Corporate Member offering. We want your staff to see the benefits of belonging to a professional body, to experience all that CII Sec has to offer, and to be empowered to take control of their own career development.

CII Sec's competency-based, and peer reviewed assessments underpin individual membership, they are unique within in the profession, distinguishing CII Sec accreditation from traditional knowledge-based qualifications. They go a long way to ensuring cyber and information security professionals meet the highest professional standards. Individuals can use their hard-earned post nominals to give their CV, social profile and signature an edge, and prove competence to peers and clients.

Individual member benefits:

You'll be invited to our in-person annual conference at a preferential rate where you can network and listen to the industry's most influential speakers.

Widen your horizon by reading our viewpoints and articles from thought-leaders.

Our member-only training resources such as webinars, masterclasses and development programmes, will broaden your knowledge.

Stay up-to-date with our monthly round-up of articles and podcasts from leading cyber and security professionals.
